THROUGHPUTS

The rugged and lightweight Hughes 9211-HDR is a cost-effective High Data Rate satellite broadband terminal providing high performance and Quality of Service for users needing a secured and reliable connection wherever they might be located.

Lightweight and compact it offers streaming broadband speeds of over 650 kbps with features such as built-in and multi-user WiFi access.

It enables users to send and receive IP traffic via Ethernet and/or 802.11 b/g/n WiFi and includes voice of fax via telephone connection.

The Hughes 9211-HDR service is based on Inmarsat's BGAN HDR service network which enables the higher streaming rates.
