

The Telecom market becomes more innovative than ever before.

On November 9, 2015 three innovative solutions will be launched by IEC Telecom on the Abu Dhabi International Petroleum Exhibition and Conference, ADIPEC.

ABU DHABI, November 9, 2015 - By exhibiting at **ADIPEC 2015**, the leading global provider of managed network communication solutions IEC Telecom Group will highlight its range of business satellite communications solutions, **Thuraya Orion Edge, Internet Welfare, Managed services**, which offer satellite internet services, provides reliable, managed-end-to-end solutions for the oil and gas industry.

Thuraya Orion Edge is a performant and affordable maritime broadband with full optimized data and voice service, budget control tools communication, scratch card available for crew welfare included. These are powerful tools to **control usage and budget**.

Internet Welfare is a **Yahclick (Yahsat)** powered internet access for large number of users staying in remote locations for long shifts. Internet access is accessory in communicating with relatives but also in dealing with your daily life like paying invoice, ordering services, organizing travels, etc.

Managed services are a tailored interconnection solution all-inclusive of installation, exploitation and support, monitored 24/7 with premium support access 24/7 and private reliable, secure and performant network.

These three innovative solutions were initiated as a reaction to the request of Global market.

Mr. Nabil Ben Soussia, Managing Director, IEC Telecom Abu Dhabi, commented: "As an important regional and global platform for business and opinion leaders, **ADIPEC** provides an important opportunity for IEC Telecom to meet current and future partners in the oil and gas industry, exploring new opportunities. Energy remains key to the growth of the UAE, and is a sector we are proud to support through broadband solutions and our innovative satellite connectivity solutions. We look forward to showcasing the benefits and advantages of world leading connectivity for the energy industry in the Middle East and the rest of the world."

With over 1,800 exhibiting companies and over 60,000 oil & gas professionals, IEC Telecom's participation at **ADIPEC** also highlights its ongoing commitment to explore opportunities to offer high quality internet solutions and becoming a globally recognized satellite broadband operator across the globe.

For 20 years now, IEC Telecom Group has been supplying **high quality satellite-based technology** providing clients with efficient end-to-end voice and data services, when and where, it matters most. IEC Telecom nowadays reaches customers in: all sorts of operators in the energy sector (oil & gas, mining, fossil and renewable) humanitarian organizations, the media, maritime companies, governments and public institutions and many other enterprises throughout the world.
